-

Purpose

Florida Poly desires private support to build out the campus to provide academic, research and student development opportunities to the University community through a ground lease agreement.

Objective

The University seeks to advance the following objectives:

- Enhance the development of stronger academic and research programs related to the areas of expertise of the University.
- Collaborate on potential degree program expansion that benefits the University's mission.
- Establish internship, graduate research assistant or similar programs, and/or cooperative programs for University students.
- Provide consideration of University students for career opportunities related to their fields of study.
- Engage in collaborations with University faculty leading to enhanced education of students and advancement of research in fields related to University areas of focus.
- Further development of campus by building additional buildings or spaces for University staff or faculty, including but not limited to the Florida Industrial and Phosphate Research Institute (FIPR) and the Advanced Mobility Institute (AMI).

Presentation

Dr. Randy Avent
Florida Polytechnic University President

Important Information

- **Authorized University Representative**

The only authorized University Representative to speak to during this process is Treasa McLean.

- **Restricted Respondent Communications**
