

FLORIDA POLY®

PAGING DR. ART(ificial) INTELLIGENCE

A panel discussion with leading medical experts where we explore the intersection of artificial intelligence and healthcare and its profound impact on patient outcomes, clinical decision-making, and the future of medicine. From accelerating diagnostics to personalized treatment plans, our panelists will delve into how AI is transforming the healthcare landscape, addressing challenges, shaping the delivery of care, and what it means to you. Join us as we navigate the possibilities and implications of AI in revolutionizing healthcare as we know it.

Thursday, March 28 | 3:30 p.m.

Barnett Applied Research Center, Room 2200
