

FLORIDA POLY®

A.I. Goes to War

As wars drive innovations in artificial intelligence (AI), and Congress presses the Pentagon to invest further and move faster in the development of AI, a panel of experts in the application of artificial intelligence in the military and law enforcement will explore and debate what future conflicts may look like as AI joins the fight. Join us for a fascinating and informative panel discussion on robotics and artificial intelligence as the military and law enforcement prepare for the next age of conflict.

Wednesday, Jan. 31 | 3:30 p.m.

Barnett Applied Research Center, Room 2200

Refreshments Provided | Free Event | Open to the Public
