

Hire Florida Poly

We're ready to serve, influence, innovate, and lead.

TECHNICAL AND SOFT SKILLS

Past internship providers have noted professionalism and leadership abilities as areas of excellence demonstrated by Florida Poly interns. A Florida Poly intern also brings strong technical skills to the internship.

INDIVIDUALIZED RECRUITING

Florida Polytechnic University welcomes companies to meet our students on campus in an authentic way. Connect with Career Services to arrange a Campus Company Day which can include a student information session on your company and connections to classroom lectures.

GUIDED INTERNSHIP COURSE

Students enroll in an internship course which guides the development of learning outcomes for the internship. With the learning outcomes, the student and the employer clearly understand the goals of the internship experience. The internship course instructor is another layer of support and connection for both the student and the company.

ADVISING

Career Development advising begins when the student chooses Florida Poly. Our success coach team advises students on what courses to take, how to navigate the university, and how to prepare themselves for a successful career. This advising mode provides opportunity to engage in career-relevant skills throughout their academic experience.

WE ARE THE PHOENIX

Florida Poly students have unique experience in being part of a new university. They understand policy and governance in a hands-on way. These students have created their own student government association and student culture. Leadership has been built into the Florida Poly experience, so every student is ready to lead.
